

Install docker on EC2 and explore the docker commands (docker images, containers, volumes, network)

Step 1: Create an Ec2 meachin in your AWS.

Step 2: Open the given link below which has steps on how to install latest Docker version in Ec2 meachin -

<https://cloudchamp.notion.site/How-to-Install-Docker-on-Ubuntu-20-f6cda544c64f44ccb83443f8204b098e> .

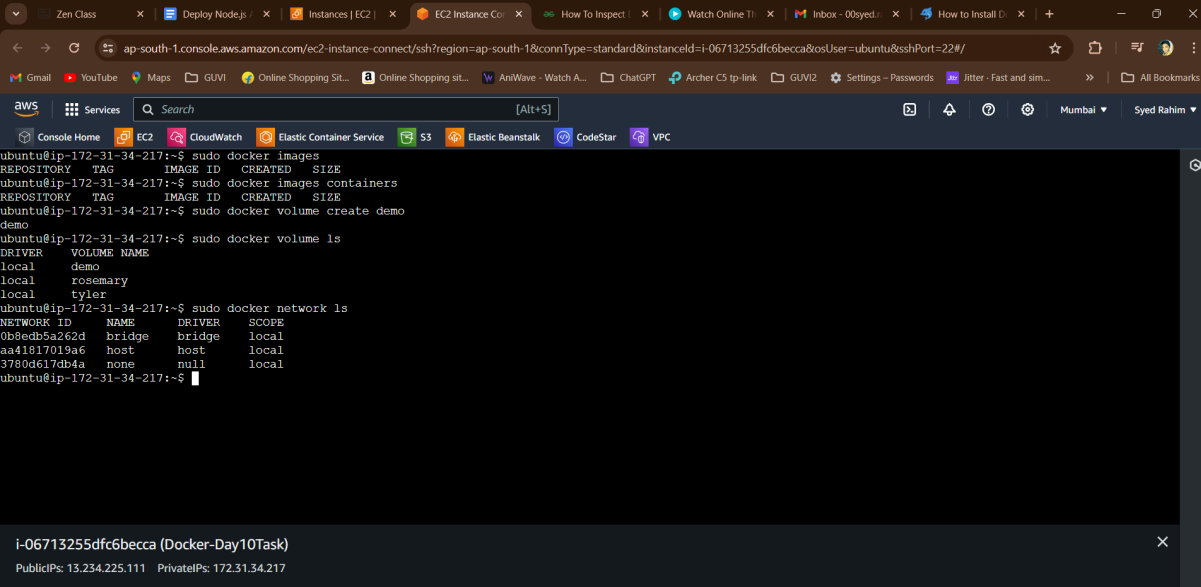

Step 3: Follow the above steps shoен in that link till step 6.

Step 4: In Ubuntu any Docker command starts with “**sudo**”.

Step 5: After installation explore the docker commands in the question (docker images, containers, volume and network).

Step 6: Docker Commands -

- 1 docker images - sudo docker images
- 2 docker containers - sudo docker images containers
- 3 docker volume - sudo docker volume create “name of volume”
docker volume - sudo docker volume ls
- 4 docker network - sudo docker network create -d bridge “netwk name”
docker network - sudo docker network ls

```
ubuntu@ip-172-31-34-217:~$ sudo docker images
REPOSITORY TAG IMAGE ID CREATED SIZE
ubuntu@ip-172-31-34-217:~$ sudo docker images containers
REPOSITORY TAG IMAGE ID CREATED SIZE
